B2B Messaging over AS2 with Security and Reliability

AdroitLogic delivers AS2Gateway in a cloud-based Software-as-a-Service (SaaS) model as well as a standalone application catered for on-premise deployments. The cloud-based solution is hosted at as2gateway.org where you can simply sign up and start trading in just a few steps.

Cloud or On-premise Deployment

AdroitLogic is fully compliant with the AS2 specification published by Drummond and Morberg, while ensuring the security of exchanged data via encryption, digital signature validation and guaranteed integrity through MIC (Message Integrity Check) hashing. Data security is further enhanced by utilizing the latest SSL/TLS channelling technologies as a supplementary security standard.
Hassle-free Set-up

To set up connectivity, AS2Gateway provides a comprehensive view which unifies all the required information that you need to share with your trading partners. The process is further simplified by the convenient facility for sharing information with your trading partners via email, right from the dashboard.

- **Simplified Certificate Management**
  AS2Gateway facilitates digital certificate manipulations through a simplified user interface, providing an easy and intuitive means of generating, importing and exporting certificates in different formats.

- **Logging and Monitoring**
  AS2Gateway provides audit trails for organization administrators to monitor the actions executed by users. In addition, it provides a statistics view where users can monitor the number of messages transferred within a particular time frame.

- **Connecting Internal Systems**
  With dedicated SFTP connectivity for your organization**, AS2Gateway can be configured to automatically upload inbound documents into relevant SFTP locations, offering a versatile integration point for your existing internal systems.

- **Ease of Use**
  Trading using AS2Gateway is just as simple as sending and receiving emails from a web-based email system. You can simply exchange EDI files or other trading documents as message attachments within the comfort zone of your web browser.

### Multiple Trading Partners

With no limits imposed on the number of trading partners, you can manage all your trade relationships through a unified dashboard **

### Multiple Formats

AS2Gateway is a payload agnostic system where you can utilize the security, reliability and non-repudiation offered by the AS2 protocol to send/receive any type of payload that you wish.

### Notifications via Email

Never miss out on the important events by configuring AS2Gateway to automatically send important notification emails to relevant users of the organization.
