

AS2Station

Enrich your Business with Electronic B2B Trading

AdroitLogic AS2Station provides a B2B trading platform for organizations trading over the AS2 protocol, with a simplified and intuitive interface. The extensibility of AS2Station makes it an ideal partner for organizations looking forward to seamlessly integrate AS2 capability to their existing systems and technology stacks.

Secure and Reliable Trading

AS2Station is fully compliant with the AS2 specification published by Drummond and Moberg, while ensuring the security of exchanged data via encryption, digital signature validation and guaranteed integrity through MIC (Message Integrity Check) hashing. Data security is further enhanced by utilizing the latest SSL/TLS channelling technologies as a supplementary security standard.

Connecting Internal Systems

AS2Station is powered by AdroitLogic UltraESB, a performance-proven Enterprise Service Bus that supports most of the popular transport protocols including HTTP/S, S/FTP, JMS, AMQP, email and much more.

Your AS2Station deployment can be integrated with your backend systems using any of these protocols, while also reaping the benefits of the powerful mediation, fault tolerance and high availability features offered by the core UltraESB runtime.

Intuitive Dashboard

Trading using AS2Station is as simple as sending and receiving emails from a web-based email system. The messaging dashboard will make you feel right at home, with almost the same appearance and functionalities from your favorite email client.

You can simply exchange EDI files or other trading documents as message attachments within the comfort zone of your web browser.

Hassle-free Set-up

To set up connectivity, AS2Station provides a comprehensive view which unifies all the required information that you need to share with your trading partners. The process is further simplified by the convenient facility for sharing information with your trading partners via email, right from the dashboard.

Simplified Certificate Management

AS2Station facilitates digital certificate manipulations through a simplified user interface, providing an easy and intuitive means of generating, importing and exporting certificates in different formats.

Notifications via Email

Never miss out on the important events by configuring AS2Station to automatically send important notification emails to relevant users of the organization.

Logging and Monitoring

AS2Station provides audit trails for organization administrators to monitor the actions executed by their users. In addition, it provides a statistics view where users can monitor the number of messages transferred within a particular time frame.

Multiple Trading Partners

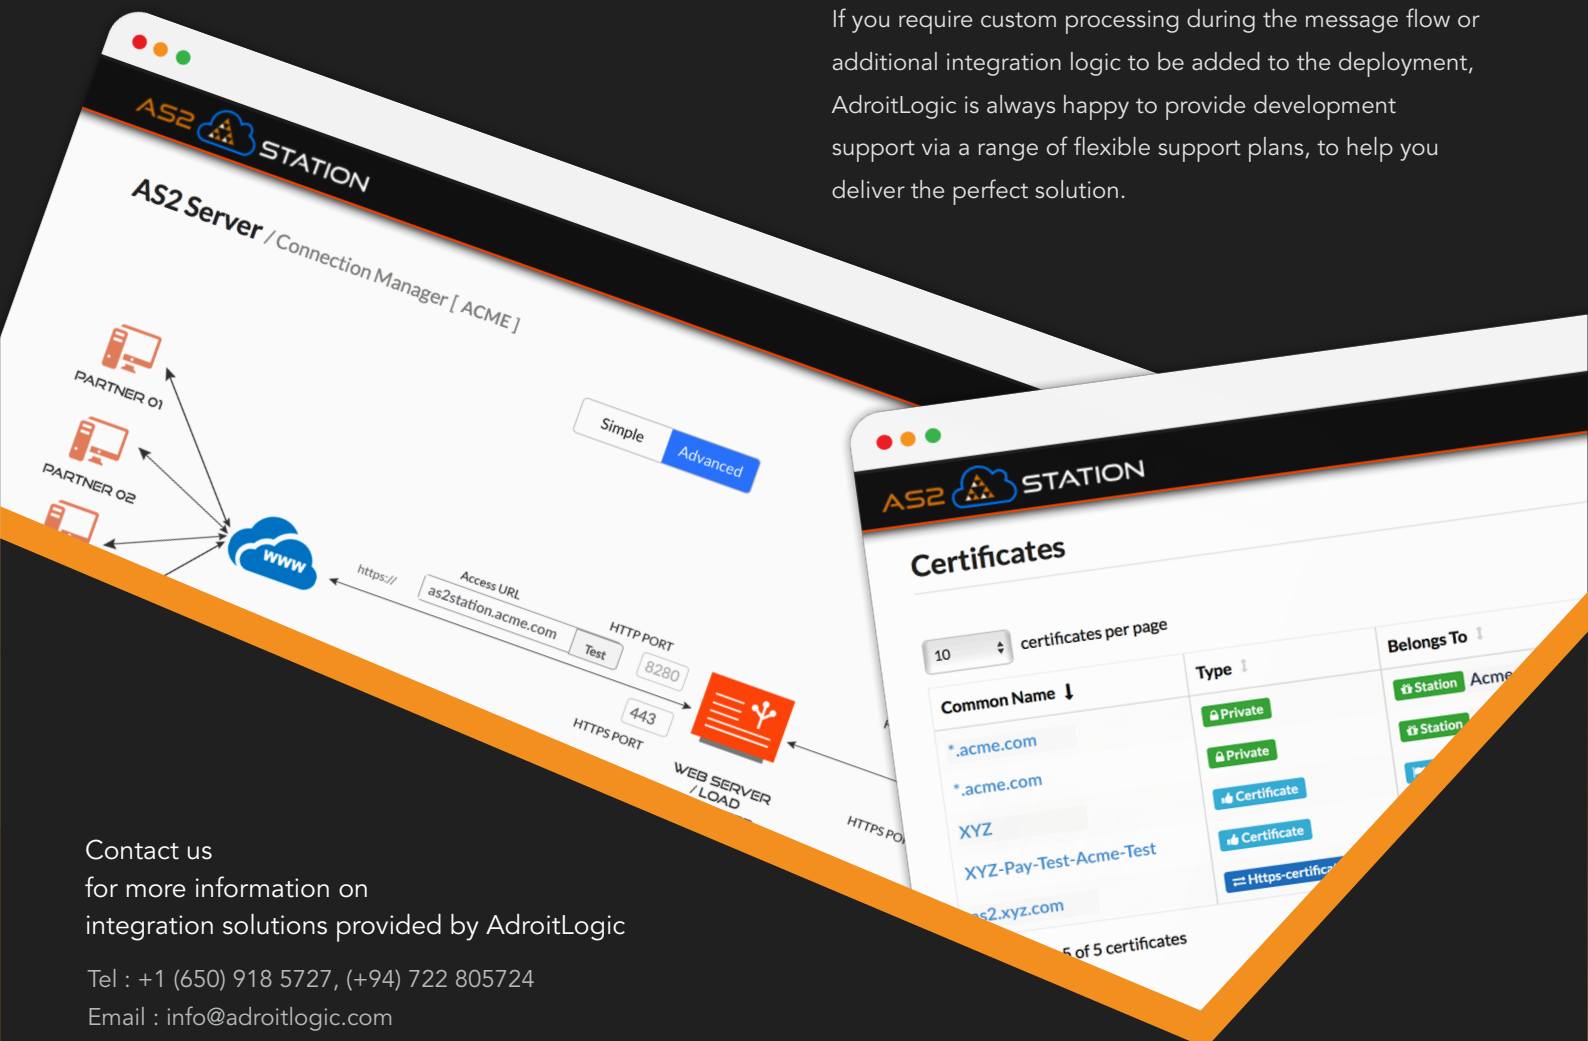

With no limits imposed on the number of trading partners, you can manage all your trade relationships through a unified dashboard.

Multiple Formats

AS2Station is a payload agnostic system where you can utilize the security, reliability and non-repudiation offered by the AS2 protocol to send and receive any type of payload that you wish.

Extensibility

If you require custom processing during the message flow or additional integration logic to be added to the deployment, AdroitLogic is always happy to provide development support via a range of flexible support plans, to help you deliver the perfect solution.
