

NOW HIRING

QA Engineers

If you have the courage to do truly great work,
then this is your calling...

AdroitLogic is seeking passionate and
talented QA Engineers...

*If you can test it, stress it and ensure it's right,
We'll hire you, and make you even more Adroit!*

Requirements

- ◆ BSc/MSc degree in Computer Science and Engineering or a related discipline
- ◆ Strong knowledge of software QA methodologies, tools, and processes
- ◆ Experience in writing clear, concise and comprehensive test plans and test cases
- ◆ Hands-on experience with both white box and black box testing
- ◆ Solid knowledge on SQL and scripting
- ◆ Experience in working in an Agile/Scrum development process
- ◆ Proven working experience in software development or software quality assurance would be an added advantage
- ◆ Experience in performance and/or security testing, automation tools (Selenium WebDriver, Protractor) and a sound knowledge on Web Services, API management, JMS, SOA, and TCP is a plus

Responsibilities

- ◆ Review requirement specifications and technical design documents to provide timely and meaningful feedback
- ◆ Create detailed, comprehensive and well-structured test plans and test cases
- ◆ Estimate, prioritize, plan and coordinate testing activities
- ◆ Design, develop and execute automation scripts using a variety of tools
- ◆ Identify, record, document and track bugs thoroughly
- ◆ Perform thorough regression testing to verify fixes

Freshers and interested parties are welcome to apply
